To Whom It May Concern:

March 13th, 2017

This recommendation letter is issued in recognition to NurGeoService's (NGS) contribution to Abu Dhabi Plaza Project (ADP) with their role of **Setting out Engineers**.

ADP is a development Project located in Astana the Capital City of Kazakhstan; the complex consists of offices, residential, shopping spaces and hotels. With five towers reaching to different levels, the uppermost among which touches the height of 320m by more than 75 floors, this complex is stamped as the first tallest towers project in the Central Asian region.

NGS duties cover all project surveying works described hereafter but not limited to; Control Network establishment and regular maintenance, Pre-entry Topographical Surveying, global Setting Out works and in particular the Core Wall and Mega Columns verticality control, Outriggers positioning, main and secondary steel structure beams, anchor bolt holes, conducting dimensional measurements of the stiffeners, Embedded and fin plates and finally Construction As-built reporting. Moreover, NGS are in charge of settlement monitoring works for all surrounding properties that are located within an 80-meter radius from project boundary.

The scope is suitably staffed with high caliber Geomatic Engineers, Surveyors and Assistants, furthermore the teams are well equipped with state of the art surveying appliances, gears and software applications.

NGS have proved themselves professionals in terms of readiness, performance and reliability, they have also shown a commitment to the SNiP and GOST Regulatory deliverables, likewise they have shown a paramount compliance to Health, Safety and Environment procedures, accordingly I am very confident that NGS would make a difference to any project they step into.

Regards,
Elie Dibe.
